Company Overview

Borake Netserve is an IT Solution Company that provides Computer Services, Products and Support Services to medium, large companies and organisations since 2011. We provide these services to local municipalities and other government agencies, local mines and solar energy companies. From small, private firms to large scale businesses, no matter the company. Our IT Support Services can offer up to the minute complete IT solutions, systems, and storage.

Our team is made up of experienced and qualified IT professionals. Whether you are looking for ad-hoc or fully managed IT services, we offer flawless support to our clients in need. The company is locally recognized as General IT Support Service Provider, that is why we provide a high-end solution for all IT related issues that clients encounter, from computer software to web development, and networking. We are also on hand in times of need and can provide a crucial backup and troubleshooting, as well as the latest malware solutions to protect your business's most precious information.

Borake Netserve (Pty) Ltd is located in the Tsantsabane area (Postmasburg), Northern Cape, South Africa. Here at Borake Netserve tasks are carried out with zero-time latency ensuring that delivery is as per client's expectations, on a personal and professional level. Due to a workforce, this business can be referred to as a fun-sized business. Our sociable energy helps to bring about tranquillity, relieving any pressures.

Company History

This company started as **Dee'Oh Prints** in 2001, at the place called Pampierstad- the former North-West, which is now Northern Cape. It was found and managed by Mr. **Freddy Ohaletse Borake**. By then, the company offered Graphic Design services to local schools only.

Dee'Oh Prints was not registered by then, it was later registered as **Borake Netserve (Pty) Ltd** in 2011, when the founder relocated to Postmasburg. Since then, the company has been assisting businesses by providing practical advices and solutions till to date.

About the Company Founder

Mr. **Freddy Ohaletse Borake** is a Website Designer & Developer, he simply uses HTML to build block of Web pages, PHP for collecting form data, CSS language to make those Web pages pretty, and XML the markup language for programming the Web.

He has programming skills (known as web programmer), which means he is not only the architect of how a page will appear on the Internet. But he also implements his own designs through programming. He can be called part artist, part writer, and part computer expert.

Some of Our Biggest Awarded Projects

2015- Tsantsabane Community Development Centre (SIOC)- Kathu
While in business, Borake Netserve received its first Web Development Project at Tsantsabane Community Development Centre, which eventually moved to Kathu, Northern Cape.

2016- Tsantsabane Local Municipality
Received another Web Development Project at Tsantsabane Local Municipality, and currently doing web updates and maintenance for them.

2019- Kolomela Mine (Anglo American)
Received Web Development and Hosting Project at Kolomela Mine Business Development Hub (Anglo American), and continued with their web maintenance and updates till 2023.

My Web and Maintenance contract was stopped because of the amendments made to Anglo American's main website, which is now housing all the Anglo American's Business Hubs.

Some of Our Big Completed Projects

2019- SEDA (Kuruman)
The same year (2019), Borake Netserve became Web Development and Hosting service provider for Kuruman-SEDA's beneficiaries till to date.

2019- Peace Humansrus Trust- Jasper Wind Farm (Groenwater Solar Panels)
Borake Netserve received a Web Development and Hosting Project at Peace Humansrus Trust. And performed documentation designs, including Competition Animation Design Project for kids.

2020- Kheis Local Municipality
Received an invitation for bidding a Website Development and Hosting tender for Kheis Local Municipality. Borake Netserve is still responsible for their website maintenance and updates.
